

Introduction to Rubis Model Building

19th April 2010 – Aberdeen UK

We would like to invite you to a free training day. This session will be presented by Joop de Wit and is entitled:

Introduction to Rubis Model Building

The session will be predominantly hands-on. No prior experience of using KAPPA ECRIN is required however if you would like a free evaluation copy before the session to help you get started please contact tcs@kappaeng.com. Experienced users will see and use the latest version and particular user issues will be addressed.

The session will include:

- building and running a multi-layer model
- Using data from a Geo-modelling program
- Water coning and cusping
- Evaluating development scenarios
- Modelling reservoirs with changing PVT properties
- Aquifers and waterflooding

Location: [IC Training](#)

Crombie House - 72-90 Crombie Road
Aberdeen - Aberdeenshire
AB11 9QP
United Kingdom

If you are interested in attending please mail tcs@kappaeng.com . We look forward to seeing you.

Please note this session is FREE and includes a light lunch. Our presenter comes especially to conduct this session and this means it is costing us a few dollars to arrange. We respectfully ask that, in the event of cancellation, at least two week's notice are given. We really do not want to do it but, in the event of cancellation within the two week period, we reserve the right to charge a fee.
